Deeper Hotel Spend Understanding

Data Enrichment

With accurate and rich data analysis, you gain the full picture of total spend, that helps your business connect and engage with hotels.

Powerful Invoice Collection

As members of the Conferma Connect network, over 50,000 hotels globally are able to actively update their communication preference ensuring we always have the correct contact to collect invoices.

What You Get:

- Deeper understanding of hotel spend
- Improved supplier relationships
- Specialist invoice collection process
- Data validation
- Full line item breakdown and automated reconciliation
- Enhanced expense reporting

How does it work?

Our data enrichment solution starts by collecting the hotel invoices for each Conferma transaction. We then verify the information is correct and match the amount, date, and line item breakdown to the transaction it belongs to. Your enriched data is then presented in detailed reports within Conferma Snap.

1. Trigger

All transactions without an invoice after 24 hours will fall into a chasing process.

2. Automate

Automatic chase up to 3 times; 1 chase every 24 hours.

3. Follow up

The Conferma Snap+ team chases up to 3 times; 1 follow up can include a call and an email invoice reminder.

4. Matching

Transactions are removed from the chasing process once an invoice has been matched.

5. Report

Enriched data is presented in detailed reports within Conferma Snap.
